

ΕΦΗΜΕΡΙΣ:
OR,
A DIARY

Of the
Cœlestial MOTIONS,

For the year 1659.

The State of the Year:

WITH
Divers Astrological and Chronological
OBSERVATIONS:

ALSO
A Table of Houses,
WITH

The ready Use thereof, enabling an
ordinary Capacity to the erecting a Fi-
gure of Heaven, for any time whatsoever.

BY
JOHN GADBERT,
φιλομαθηματικός.

Vita brevis, Ars longa. Cardan, Seg. i. Aphor. i.

London: Printed by J. C. for the Company
of Stationers.

A N
ADVERTISEMENT.

THE *Doctrine of Nativities*, which I mentioned in my last years *Almanack*, is now made publick, for the encouragement and benefit of all generous Spirits. It is divided into three Parts.

The First treateth of the Beginnings or Principles of *Astrologie*, with a *perspicuous Method* for to judge of all manner of *Nativities*, *illustrious* or *mean*: Also the *Doctrine of Revolutions* much enlarged: And *Examples* of a *Nativity* and *Revolution*.

The second containeth the *whole Art of Directions*, and *Tables* of all sorts fitted for the same purpose. And to the end that the calculative part of *Nativities* may be the more compleat and perfect, there are *Tables* of the *Planets Middle Motions* inserted, whereby may be obtained their places for any time, either *Past*, *Present*, or *To come*, more accurate and true, then by any *Ephemerides* whatsoever; and the way how to apply them to all the principal parts or places of the world.

The Third discourseth of the *Doctrine of Horary Questions*, wherein is propounded and answered all necessary doubts contingent to the *life of Man*: which is of great use in the absence of a *Nativity*. In the Book throughout, the firm and sound Principles of *Astrologie* are made known and embraced, and the *Chaff* of Superstition and Error rejected; and every thing is rendered so *facile* and *plain*, that an ordinary capacity may attain to a sufficient degree of *Knowledge* therein, (yea, almost) without the assistance of a *Tutor*.

The Book is printed for, and sold by *William Larner*, *Daniel White*, and *Giles Calvert*, at their Shops on *Ludgate-hill*, and in *St. Pauls Church-yard*.

A Table of Terms, for the Year 1659.

Hilary Term commenseth *January 14.* and *February 12.*

Effoy n Days.	Dayes of Exception.	Actuina Brevium.	Days of ap- pearance.
Octab. Hill. Jan. 20	Jan. 21	January 22	January 24
Quind. Hill. Jan. 27	Jan. 28	January 29	January 31
Craft. Pur. Feb. 3	February 4	February 5	February 7
Octab. Pur. Feb. 9	Febru. 10	Febru. 11	February 12

Easter Term initiates *April 20.* conuenereth *May 16.*

Quind Pasc. Apr. 18	April 18	April 19	April 20
Tres Pasc. April 25	April 26	April 27	April 28
Mens. Pasc. May 2	May 3	May 4	May 5
Quinq Pasc. May 9	May 9	May 10	May 11
Craft. Ascens. May 13	May 14	May 15	May 16

Trinity Term initiates *June 3.* conuenereth *June 21.*

Craft. Trin. May 30	May 31	June 1	June 3
Octab. Trin. June 6	June 6	June 7	June 8
Quind. Trin. June 13	June 13	June 14	June 15
Tres Trin. June 20	June 21	June 22	June 23

Michaelmas Term begins *October 24.* periodeth *November 28.*

Tres Mich. Octob. 20	Octob. 21	Octob. 22	Octob. 24
Mens Mich. Octob. 27	Octob. 28	Octob. 29	Octob. 31
Craft. Anim. Novemb. 3	Novemb. 4	Novemb. 5	Novemb. 7
Craft. Mart. Nov. 12	Novem. 12	Novem. 14	Novem. 15
Octab. Mart. Nov. 18	Novem. 19	Novem. 19	Novem. 21
Quind. Mart. Nov. 25	Novem. 26	Novem. 26	Novem. 28

If by the *Law* some persons do not *gaine*,
They'l curse the *Lawyers*; when within their *brain*
The *Knave* or *Fool* doth certainly *remain*.

Shall we the *Broom* *blame*, cause the *Channel* *smells*?
Or *burn* the *Belfee* for the *noise* o' th' *Bells*?
This were *injustice*, without *Parallels*.

If *Rusticus*, would from the *Law* live free,
Then *Rusticus*, a *quiet* man must be.

A Table of Kings, &c. since the Conquer.

We are, with *Kings* and *Queens*, made of one blood,
'Tis *Power* makes us all, both *great* and *good*!

Their Names.	Their Birth	Their Reign began.	Reign'd yea mo.	Their Reigns ended.
Wil. Conquer	1023	Octo. 14 1066	20 11	Septem. 9 572

Oliver Lo. P.	1599	Dec. 16 1652	4 9	Septem 3 1

'Tis surely true, *Kings* are like *gods* below!
And can command the *stiffest* *Knees* to bow
Unto their *Graces*: but when *fullen* death
Conjures them to resigne their (*frailer*) breath,
"Who can discern, but that the *Lazar's* story
"Is writ as fair in th' *Grave*, as *Nimrod's* glory?"

A Table of Essential Elements of the Planets, according to Ptolemy.

Globes and Spheres, and the Mathematical Jewel, made and sold by *Joseph Moxon*, at his shop in Cornhill.

The young Sea-mans Guide, or the Astronomical Mariner; a Book of singular use for persons Mathematically inclined: Written by *T. Gadbury*, and shortly to be published.

January hath xxii days.

Here *Mercury* and *Jupiter* oppose,
From fixed Signs; and *Venus* backward goes:
Sol, *Chiron* 'quares; *malicious* the hate is,
For, it doth come, from *Signum falsitatis*!

Titan and *Jove*, presage prodigious odds.

'Twixt men on earth, that are accounted gods.

February hath xxviii days.

Imperial Chronus doth salute his Lord;
 The signe is good, when great ones do accord.
 And splendid Lucifer greets Stilbon too;
 And (by her backward motion) doth him woo.
 The world is happy! Prosperity doth shine
 In Taverns, (now) since rated is their wine.

March hath xxxi days.

What, though the highest Planets backward run?
 Stout Mars is fixed; and Jove trines the Sun:
 And blushing-Venus gets within the Line
 Of Chronus love; nay, courts him by a Trine.
 If Levi's-Tribe could preach in Flinty-men,
 Blest Unity! we'd Reverence 'em then.

April hath xxx d ys.

Bavarians, and Gelibutians complain;
 Poor Ireland groans; and Italy wants Rain;
 The Russians mourn; the Medes, and Tartars weep;
 Nor can his Holiness, securely sleep:

*Th' eclipsed Moon, and other angry Stars,
 Prefage to them, both Famine, Plague and Wars!*

June hath xxx days.

To usher in this Month, Phaeton begins
To punish *Venus*, for her former sins;
Great *Sol* with *Phaëon* Trines; *Hermes*, and *Jove*,
And Warlike *Mars*, each other greet in love.
The two Malignants do oppose on high,
Portending Troubles in the earth, and skie.

July hath xxxi days.

From th' Conscience of a Rowland, Homes, or Gault;
 From the dire Fury of an Hospital:
 From th' buzzing noise of Thomas Dunghill's Bawl;
 From Barbers baseness, 's Beetle-head, and all;
 Libera nos Domine! These pious men
 Do erre, much like the wicked, (now and then.)

Augst hath xxxi days

The Sun and Jupiter, in Leo joyn;
Mars salutes Venus, by a semi-Trine,
And Squares both Joye and Titan; whilst that they
To Saturn's Sexile swiftly post away.

I like it not, when men are forc'd to run
Out of God's blessing, into th' parching Sun.

October hath xxxi days.

October ! welcome ; for thou dost appear
To be the friendliest Month in all the year.
Four times the Planets mutually joyn,
And (full) three more they lovingly do trine :
“ Besides two Sextiles ; which [assuredly]
“ Brings life to Man, though Vegetables dye.

Jaies	Festivals.	The Planers daily motions.										Mutual pects an weather.

December hath xxxi days.

D.ember comes in coldy, and requires
Warm Cloaths and Dyet, Sack, and Nose-high Fires.
Speak we of Christmas to the zealous-Brother,
Ob! out! profane! (crys he) it is another
Nebo or Bel! and superstitious Pyes
(That feed the wicked) of-send-our gadly-eyes.

daie	Festivals.	The Planets daily motions.												Mutual A- pects and weather.

How to set a Figure of Heaven, &c.

HE that would learn to erect a Figure, must know, that there are seven Planets, or Erratique stars, which are continually moving in the 12 signes of the Zodiacke, in configuration one with another. Before I inform you, how, it is requisite, that I insert the characters of each Planet, and of the signes they move in, and of the Aspects they make, or behold each other with; which things, as they are easily learned, so ought they to be perfectly learned, by such, who hope to attaine the knowledge of any thing, in *Astrology*:

Of the seven Planets, their Natures, Characters and Names, with the two Neades.

- ♄. Saturn, is a Planet cold and dry, an Infortune.
- ♃. Jupiter, is Hot and Moist, a star Benevolent.
- ♂. Mars, is a star Hot and Dry, a Malevolent.
- ☉. The Sun is Hot and Dry, and of disposition friendly.
- ♀. Venus, is cold and Moist, a star fortunate.
- ☿. Mercury, is of nature cold and dry; he is variable.
- ☾. Luna, is cold and moist, his disposition indifferent.
- ♏. Dragons Head, is held Fortunate.
- ♐. Dragons Tayle, is found unfortunate:

Of the twelve Signes, their Characters, Natures, and Names.

- | | |
|--------------------|-----------------------|
| ♈. Aries. Fiery. | ♎. Libra. Airy. |
| ♉. Taurus. Earthy. | ♏. Scorpio. Watry. |
| ♊. Gemini. Ayrye. | ♐. Sagitary. Fiery. |
| ♋. Cancer. Watry. | ♑. Capricorn. Earthy: |
| ♌. Leo. Fiery. | ♒. Aquarius. Airy. |
| ♍. Virgoe. Earthy. | ♓. Pisces. Watry. |

Of the five Aspects, their Characters, Names and Natures.

☿. *Conjunction*, is good, with good, & *à contra*. It happens when Planets are in one signe, degree, and minute.

*. *Sextile*, is good, and is made, when Planets are 2. signes distant.

□. *Quartile*,

□. *Quartile*, is bad, and is made, when *Planets* are 3 signes distant.

△. *Trine*, is good, and is celebrated, when *Planets*, are 4 signes distant.

⊙. *Opposition*, is malicious, and is the distance of 6. signes.

Having attained this, you may set a figure by the Table of Houses, beforegoing thus.

First, Draw with your Pen, or Pencil, a Dodechedron, or Figure of 12. equal Angles, or Parts, with a space in the middle, as is to be seen in the following Example.

Secondly, Consider the Day, Hour, and Minute, for which you would erect your Figure; which done, seek the Sun's place at noon in the Ephemeris, the day you set the figure for; and enter the Table of Houses under the signe you finde the ☉ in, and in the tenth House, against the degree of the Sun, to the left hand, you will finde certaine houres and minutes, unto which if you add the houres and minutes of the time of the day (reckoning with Astronomers, your day from Noon, to Noon) you set the figure for, the product (except it exceed 24. houres) is to guide you in the same column, viz. under the Title time from Noon, untill you finde the Number; against which in the collateral column, you have the Cusps of the six Orientall Houses, viz. 10. 11. 12. 1. 2. 3. the others are alwayes opposite, both in signes, degrees, and minutes. But, if the aggregate exceed 24. houres, then cast away 24^h and the number remaining shall be your guide.

As for Example.

Suppose it be required to know, how the Heavens are posited at one of the clock after noon the fourteenth day of January this year, 1659. I first seek the place of the Sun in the Ephemerides, which against the fourteenth day at noon, I finde to be 5. degrees of ♊. therefore I turn to the Table of Houses under ☉ in ♊; and in the column of the tenth House against 5. degrees of ♊. (The place of the Sun.) to the left hand are 20 h. 29 m. under the Title time from noon; unto which if I add the time of the day, viz. one hour, the aggregate is 21 h. 29 m. Now, I seek for this

Number in the column, entituled, Time from Noon, and the nearest to it, is 21 h. 30 m. against which Number, I finde the *Cusps* of the six Houses to the *Orient*, thus. (the opposite Houses have opposite signes, &c.)

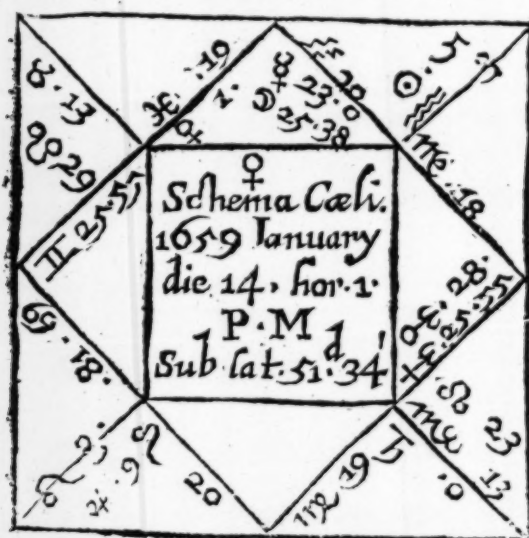

A Collection of the Cusps of the Houses.

Orientall	{	10. house. ♄ 20	{	Occidentall.	{	4. house. ♄ 20
		11. house. ♄ 19				5. house. ♄ 19
		12. house. ♄ 13				6. house. ♄ 13
		1. house. ♄ 25. 55				7. house. ♄ 25. 55
		2. house. ♄ 18				8. house. ♄ 18
		3. house. ♄ 3				9. house. ♄ 3

The Figure follows.

The next thing is, to enquire for the *Planets* places, on the said fourteenth of *January*; and at noon (without *Reduction*) their places are thus.

h. o. m. ♄. 9. ♄. 2°. ♄. 5. ♄. ♄. 1. ♄. ♄. 23. ♄. D. 35. 38. ♄. ♄. 29. m. the taylor is opposite thereunto.

Now

A Generall Judgment on the year, 1659.

Now to place these in the *figure*, you must observe this rule, if your *Planets* place be lesse then the *Cusp* of your *House*, you must see him before the *Cusp* thereof; if more then your *Cusp*, then place him behind; as in the *figure* is shewn.

Note, that if you set a *figure* for 4. 5. 6. or 7. *houres* after noon, the *Moon* will require a *reduction* in his place, by reason of the swiftness of his *motion*; which, according to his mean motion, (being 12 degrees in a day,) is 30 *m.* an *houre*, and so by *Addition* in the afternoon, or *subtraction* in the forenoon, to, or from, his place at *noon*, you may gaine his place, truly enough, for all manner of ordinary matters or *Questions*; But for *Nativities*, you ought to learn *Regiomontanus* his *Rationall way*, for the erecting your *figure* thereby. Thus much, I thought convenient to signify or make known unto the ingenious *Tyroe*; and if any thing herein shall seem *difficult* or hard unto him; Let him communicate it unto the Author, who will give him any convenient satisfaction.

Being confined unto a narrow scantling of paper, it cannot be expected that I should speak largely of this years actions. I shall therefore limit my selfe to the giving a brieve account, first of the *Eclipses* this year, and secondly of the *Suns* ingresse into the four *Cardinall points*.

I. Of Eclipses this year, 1659.

FOUR times will the Inhabitants of this Earthy Globe, be deprived of the light of the Sun and Moon (viz. twice of each) this year. The first of which will be a Lunar defect on *Aprill* the 26. about the setting of the Sun in our horizon; Celebrated in 15 degrees of *M.* and will be visible to all *Europe*. It portends much droughr, an infectious aire, a Rot of vulgar people; Many Seditions, Rumors and discontents, great Inundations, the destruction of Fishes, and Water-fowle, &c.

The

A Generall Judgment on the year, 1659.

The Second will be an Eclipse of the Sun on *May* the tenth, in the latter degrees of δ . but it happening three houres after our Midnight, is not to be seen of us in *England*, or in any of the adjacent Islands, it therefore concerns us nothing.

The third will be a *Lunar Eclipse* on *October* the 19th. in 7. of *Taurus*, about fifteen houres after noon, and will be conspicuous to all *England*, if the Air be serene. It happens in the House of Death, and Ascendant of *Ireland*.

*Let those poor souls beware! the sicknesses
Beyond the credit of my short presage:
A dearth of corn; their Cattle strangely Dye;
The Aire's infected; monstrous cruelty
Of all sorts doth afflict them! Sea city
Of Herbs, and Fruits, and all Felicity.*

See *Proclus* of such an Eclipse, and *Antonius Guiffus. de Eclipsibus*, page 140. I forbear all further discourse hereof, and come to the fourth, ---- which is that eminent one of the Sun, on *November* 24. about 3 afternoon, and will be an almost total Eclipse, and visible to all *Europe*.

This Age hath bin famous for the many and wonderfull Eclipses, and other Cælestiall Prodigies that have happened therein; as also for the many eminent terrene effects that have accompanied them; Some of which have bin so strange, that they have amazed the Generations of Men now living to consider, and will most assuredly amuse those yet to come, unto whom they shall be transmitted. This formidable Eclipse will be nothing behind hand in signification and effect. It is celebrated in the 1st decanate of the *Scorpion*, which according to *Johannes Angelus*, signifies War, Violence, Drunkenness, Fornication, Wrath and Pride. *Si solus fuerit Eclipsis in ultimis 10. Grad. illi significat quod alienigeni Tyranni adventum, ignaviam, atq; soto diem prioris Regis omnibus invisam.* *Guiff: de Eclipsib sol.* 124. I shall pray that these words may not effectually speake *English* to this *Brittish* Isle; but rather that the God of Heaven, who alone can binde Cælestiall Influences, would protect

A Generall Judgment on the year, 1659.

protect and keep the Governours and Governed of these Nations; and let all those that are truly Religious, and Vertuous, say, *Amen.*

In the figure of this Eclipse we have ♀ Lord of the 9th in the sixth, Going to a ☐ of ♂ Lord of the Ascendant, and suddenly after to a ☐ of ☉; the naturall significator of Governours; which secretly whispers unto me some subtil Plot or Contrivance by the Blazing Meteors of Religion (whether *απεσβύλες*, or Fifth Monarchy-men, I will not take on me to determine,) against those who turn the helm of affaires in this Nation. Yea, I may aver, and that upon good ground, there is more cause, & just occasion to suspect these homebred Seminar-yes of mischief, then the publique Enemy, viz. the late Kings party. For ♀ Lady of the 7th is applying to a friendly ♂ of ☉. at the end of the Eclipse, gently courting him in the seventh House, as if the fury of all former emulation were buried in the urne of forgetfullnesse, and they (after their being Lopt, Pruned, Sequestred, and Decimated) willing to live peaceably and at quiet, under that Government they have sometimes struggled against, and contended highly with. *Fiat justitia, et ruat Cælum.*

*If Enemies turn Friends, Let them enjoy
what Friends Apostate strive for to destroy.*

Yet further, according to the Canons of *Astrologie*, this Eclipse is likely to pour down its effects upon *Englunds* Metropolis, viz. *London*. For ♂ who according to *Ptolomy* is Lord thereof, as having most Dignities in the Ascendant, Midheaven, and the place Eclipsed, is Retrograde in the third in II. the Ascendant of that great City! And what he signifies by being Lord of an Eclipse, let *Origanus*, &c. tell us. --- *Inter homines bella ciuitatis, seditiones intestinas, urbium excidia, tumultus populi, iras principum, et ab his inopinatas mortes efficit. In Corporibus morbos biliosos, febres tertianas, sanguinis eruptiones, morbos acutos, violentos interitus, præcipue iuvenum producit. In vita violentiam, iniurias, incendia, homicidia, rapinas, latrocinia affert. In aere æstus;*

A General Judgment on the year, 1659.

æstus, ventos calidos, pestiferos, tabificos, fluminum jaculationes, turbines, et siccitatem excitat. In mari subita naufragia, propter inordinatos flatus, fulmina et alia huiusmodi portendit. In fluminibus aquas exsorbet, fontes desiccatur, latrunculos corrumpit. In terra frumenta et res terre nascentes ad usum necessarias pessundat, vel dum nascuntur, pernicioso æstu vastat, vel etiam dum in vehuntur, conflagrationibus perdit. Origan. Tom. 1. fol. 459. Ptol. Quadr. l. 2. Cap. 8.

These are the naturall significations of ♄, as Lord of an Eclipse; An indifferent Schollar may English the words. But my opinion is, although many Epidemicall diseases may raigne this year, as in *Aprill* and *May* the last; yet the sickness will hardly seize on *London*, untill he enter the fiery and regall sign ♄, which is opposite to her Ascendant, viz. II (as you heard before) which will be in the year 1662 and he will continue in that signe almost 3. years, all which time *London* much expect to be a patient.

Those Persons whose Nativities concur herewith, will be considerably concerned in the effects portended; according to the meaning of Pto'my, in these words; *Defectus Luminarium in cardinibus geniturarum annuarum conversionum, noxius est.* An Eclipse of either Light falling in the Angles of a Nativity, or Annuall Revolution, is very hurtfull to the Native, happy would it therefore be for all persons to know, and be acquainted with their own Genitures, that they thereby foreseeing an evill, may the better provide against it.

Many more things might be observed from the Scheame of this prodigious defect, but the narrowness of my roome is such, that I am prevented of giving an account thereof. I conclude, only take notice that at the middle and end of this Eclipse, there are no lesse then five Planets in *Scorpio*, and all in the seventh House, which signifies Wars, S rises, and Controversies; And *Cauda Draconis* is in the Ascendant also. —————

*Take heed poor Brittain! of intestine Jarres,
So maist thou scape another ten years warres.*

2. Of the Suns entrance into the four Cardinall points this year, 1659.

CUSTOME hath made it (almost) Naturall, for the year to begin at the vernall Equinox, or Spring season; as if it were a thing prodigious in Nature for the conception to Antecede the Birth. But 'tis most congruous to Reason, for the year to begin in *December* at the Winter solstice, when the ☉ enters the tropique ♋, because at that moment of time, he hath finished his greatest Southern inclination, and begins to come towards us (who live on this side of the Equator) againe; thence by his approach instilling life by degrees into all vegetables, which though it be most apparent in *March*, at what time he enters ♈. yet it hath a being and measure while he is in ♋. And although ♈ be the birth of Vegetables, yet ♋ is the true conception of them; As my worthy Friend, Mr. *Joshua Childrey* hath briefly, yet learnedly, and satisfactorily argued, in his *Indago Astrologica*. Sect. 26.

And *Origanus* witnesseth that most of the Eastern Countreyes, following the latter *Romans*, began their year at the Calends of *January*, which then was not much distant from the Winter solstice, viz. ♋, which solstice at the birth of Christ, *Anno Mundi*. 3967. was on *December* 25. but is now about the 11th. of *December*; so that the Winter solstice falleth sooner (now) by 14 dayes, then it did, at that time. With *Origanus* agreeth that laborious and industrious Mathematician, Mr. *Blundevile*, in this thing also. But lest people should deem my writings as strange & uncouth, as they already doe the truth, I shall forbear all further discourse of this Nature here; and according to custome will begin the year at the Spring; which the Poet prettily Analyzeth, thus.-----

The winter being gone, the Earth hath lost
Her snow-white Robes; And now no more the frost
Candyes the Grass; or casts any icie cream
Upon the silver Lake, or chisell stream:
But the warm Sun thaws the benumbed Earth,
And makes it tender; gives a sacred birth

A General Judgment on the year, 1659.

*To the dead Swallow ; wakes in hollow tree
The Drowsie Cuckow, and the humble Bee.*

*Now do a quire of chirping Minstrels Bring
In triumph to the world, the youthfull Spring !*

And Mantuan in his second Eclogue, brings in Faustus, curiously describing it thus. —————

*Quandoquidem nunc alma venus movet omnia calum.
Luce tepet nitida, tellus viret, arua volucres
Cantibus exhilarant vernis, nunc omnia fectant.*

(i.e.) Now Venus fair excites all things to Mirth
Heaven's clad with Azure ; And the rusty Earth
Look fresh and green, The Birds with vernal song
Make th'woods to ring, and all are big with yong.

This pleasant time beginneth with us this year on *March* 10 d. 1 h. 2 m. P.M. at which time 17 d. of the Caelestiall Ram Culminates, and ballanceth Heaven ; and 8 d. of the Lyon is Horoscopically. ♈ is ♀ in the 12th. in Δ to ☉ Lord of the Ascendant in the 9th which friendly position, perhaps may signifie some probability of a (hoped for) peace between us and the Spaniard. Both signifiers apply, the one by retrogradation, the other by direction, as less ponderous. But I pretermit all further discourse hereof, presuming the opportunity will be improv'd by those prudent statesmen, who are peculiarly concern'd in the business ; and this as well for their own, as Countrys good.

The ☿ is in the tenth house, in the rugged signe ♄, which presages that there is yet remaining in a discontented sort of Persons, the dregs of malice and fury ; And it is an hundred to one, but they will endeavour to pour out the viols of their wrath, upon the Reputations and good Names of Princes and Governours, either in scandalous Libels, or malicious speeches, &c. Much tending to the dishonour, and disparagement of the endeavours and desires of those, who have made it their business to settle this unsteady, and (of late) bleeding Nation, in tranquility, peace, and quietness.

We have also the Moon in the eighth house, going to ☿ of ♄ in the Phlegmaticke signe ♁. (who is Lord of the eleventh)

A Generall Judgment on the year, 1659.

eleventh) and there every way weake; Inimateing unto us, a catastrophie of our hopes; by reason of the unworthy stratagens, subtil Ploies, and contrivances of Clerks, Solicitors, Secretaries, or Attournies; and the Retrogradation of \hbar . in the 4th. in \square to ψ . in the 12th. and almost in \square to σ in the 7th. aggravates and increales the mischief the more, and makes the wound the further from a cure.

Of the Summer season.

On the 11th. day of June, neer 5. houres P.M. the Æstivall Quarter commences this year. At which time both the Luminaries are in the 8th. house, and \hbar and σ . are in ρ . from the 5th and 11th. Δ casts a \square . to both, and φ . cum ψ : in the sixt house in \square . to ψ . in the ninth. I will sum up all these significations together with the rest, at last.

Of Autumne.

Æquinoctium Autumale, or Autumall Quarter Inchoates alwayes, when the illustrious Lamp of Heaven assumes the Cælestiall Ballance, and on this year it happens on September the 13. about six in the morning, at which time σ and ψ are in $M.C.$ φ is in \square . of σ . and Δ . in \square of φ . who is both Retrograde and Combust. The figure is the same (almost) with that for the Spring season.

Of winter.

Solstitium Hyemale, or the Winter season initiates when \odot enters \wp . which will this year happen on December 11th. about 7 a clock at night. Δ at that time is in \square to φ . and \hbar . who is *Dominus Septime*, is in M . and in \square to the Ascendant. The ψ is in the 10 h. (and so it was both in the Spring, and Autumall Quarters) And σ is retrograde in the eleventh house in *Quartile of Jupiter*.

☞ Of all which configurations, see *Origanus, Haly, Guido, &c.* for I want room to insert their opinions at large, But in brief, they portend many Quarrels, Contentions, and strifes among the Plebeians, or vulgar people; And Scandals, disgraces, prodigious Insultations, and reproaches against persons of the Superior degree. Tedious and heavy Law-suites among men of all sorts, and an itching desire

' A Generall Judgement on the year, 1659.

to ruine each other ; much Bribery, Baseness, and Extor-
tion reigning every where : A Corruption of Judges, and
the Administrators of Justice, &c. Mercurians make it their
business to trot and trudge about to generate mischiefs ;
The spirits of men are laden with prejudice, the better to
ballance them in their flight upon the wings of madnesse.
Nor will the abused passe by injuries easily. *Lis litem ge-
nerat.* One misfortune is no sooner over, but another is set
on foot. All sorts of persons will hug and cherish mischief,
as if it were legitimate. So that the Poets lash, may justly
reach our times. -----

Nos vulgi scelus, et cunctis graviora Cothurnis ;

Nam scelus à Pyrrha quanquā omnia symata volvas.

Juven. Nullus avud Tragicos Populus facit; Accipe nosto
Sat. 15. Dira quod exemplum feritas produxerit Avo.

And that which is as bad, as all this is, These evils are
not like to end with the year. The Conjunction of h. ♃.
in 1663. in ♌. will hardly compose us, so much as that of
the same Planets in 1643. did perplex us.
